FOR IMMEDIATE RELEASE:

XPORTECHS Resuscitates Microsoft SBS LAN solution for Heartscape Technologies Inc

Ellicott City, Maryland – Aug 29, 2007 – XPORTECHS, a leading Network Engineering and IP Telephony Solutions Partner, has been selected by Heartscape Technologies, Inc, to provide an updated Microsoft Network data solution. The system will provide Heartscape with a bevy of productivity-enhancing features such as: faster network, improved File Access, email collaboration, Blackberry Enterprise Server access, Citrix Remote Access and enhanced backup solution.

Heartscape is in the process of upgrading their network architecture to increase productivity, improve remote access, provide ease of administration, and save money. “Since our network systems were designed for a very small business, we needed to install state-of-the-art networking and more robust mission-critical communications tools. XPORTECHS was able to demonstrate to us, the potential value of the system and how we could manage and administer the system from anywhere in our organization,” said Penelope Rice of Heartscape Technologies.

“By selecting a Microsoft 2003 SBS network, we transformed our network infrastructure into a healthy, productive work environment while providing us the remote access we need for our new product launch of Prime ECG,” concluded Rice. “I can manage my complete network from any location and with Active Directory user administration is a snap. We will recoup our total cost of ownership in less than two years, and that’s money we can spend on other business issues that really need it. The superior performance and low cost of Microsoft software and HP server solutions combined with XPORTECHS’ experience are unbeatable.”

About XPORTECHS

XPORTECHS is a leading Convergent Technology company offering a full range of services including Microsoft and Novell solutions, LAN and WAN connectivity, Managed Services, Computer Telephony Integration, IP Telephony, Internet Connectivity, and Training.
