FOR IMMEDIATE RELEASE:

XPERTECHS selected by CBO Financial, Inc. to deliver XperCARE Managed IT Services.

Ellicott City, Maryland – February, 2009 – XPERTECHS, a leading Network Engineering and IP Telephony Solutions Partner, announced today that it has been selected by CBO Financial, Inc. to deliver XperCARE Managed IT Services. CBO Financial has been committed to serving their clients since its inception in 1998. The XperCARE solution proposed by XPERTECHS gives CBO Financial the “Peace of Mind” that their computer network will be reliable while providing redundancy and security.

According to, Harry Santucci, III of CBO Financial, “Our previous IT support company did not provide us with a high level of support and service. I was looking for a local company that could possibly live up to what I expected. I interviewed several IT firms and selected XPERTECHS for their professionalism, knowledge and experience. I am extremely pleased with my decision to go with XPERTECHS.”

The implementation of the XperCARE Premium Plus service was installed in just a few hours. Once the system is fully implemented, XPERTECHS will be able to monitor the CBO Financial network remotely 24/7 and provide key IT functions such as: helpdesk, problem remediation, remote backup, patch management, anti- virus/spyware protection, Internet security, and content filtering.

“XPERTECHS is very excited about the relationship with CBO Financial. “Our expertise enables us to access a situation quickly and provide rapid response time to meet the individual needs of our clients. Our ability to quickly adapt to resource requirements, scheduling and availability of products allowed us to perform without hesitation” said Michael Mellott, President at XPERTECHS.

About XPERTECHS

XPERTECHS is a leading IT Services company offering a full range of services including Microsoft and Novell solutions, LAN and WAN connectivity, Managed Services, IP Telephony, Internet Connectivity, and Training. Our focus is on delivering high quality Networking, Voice Messaging, IP Telephony and Internet Solutions that are critical to solving information needs of our clients.
